LOT 2024-04-01-939XL-W-Ultra REV 0424

I.V. HOUSE®

Protection Over and Above®

939XL-W-Ultra TLC[®] Wrist Splint

Directions: Single Use Only—Fits either wrist

1. **Unroll the TLC Wrist Splint straps** and identify the smooth concave surface of the splint. This concave surface will be placed against the patient's hand and forearm.
2. The **"fingers/wrist" label indicates proper placement**. Remove the label before applying the splint.
3. **Place the splint under the patient's forearm**, with the heel of the hand landing in the slight bend in the device.
4. **Wrap the first strap around the fingers**. Thread the Velcro[®] tab into slot and pull it through. Fold the strap around the outer edge of the splint and back onto itself. Secure with Velcro tab.
5. **Repeat with the other two straps**, securing each with the Velcro tab.
6. **Note:** Slip one finger beneath each strap to ensure the fabric is not so tight that it impedes circulation or infusion of IV fluids.
7. **If the wrist strap obscures the catheter insertion site**, consider a crisscross strap configuration instead. Put the wrist strap through the forearm slot and the forearm strap through the wrist slot.
