

I.V. House, Inc.

Capabilities Statement

Corporate Data

I.V. House is the world leader in the design and development of innovative products that stabilize, secure, and protect IV insertion sites. Hospitals worldwide use these devices to prevent patient harm and reduce costs associated with those injuries. I.V. House products combine Human Factors and Ergonomics with thoughtful input from nurses to deliver real-world solutions that improve patient safety and increase nurse efficiency. I.V. House is a certified Woman-Owned Business Enterprise (WBE) through the State of Missouri, Office of Administration, and qualifies as a small business as defined by the U.S. Small Business Administration under the category 339112, Surgical and Medical Instrument Manufacturers.

Quality Assurance

All I.V. House products are made in the USA with raw materials sourced from U.S. companies. All products are created to adhere to best practices in manufacturing and the I.V. House Quality Management System. I.V. House products are assembled and packaged at facilities that employ adults with disabilities or those with other barriers to employment.

Award-Winning Design

I.V. House, Inc. has earned six awards in the medical technology arena: The TLC Splint won a 2019 Silver Edison Award for innovation, and two Good Design Awards (2019 and 2015), given by The Chicago Athenaeum Museum of Architecture and Design. The I.V. House UltraDressing won three awards including the prestigious Medical and Scientific Equipment Gold IDEA winner (Industrial Design Excellence Award), presented by the Industrial Designers Society of America and sponsored by Business Week Magazine.
